**DUTCH SCHOOL**

**OF**

**LANDSCAPE ARCHITECTURE**

# DSL Course Overview

## **1. Introduction to this overview**

## **2. Courses per institute**

- Wageningen UR
- TU Delft
- Van Hall Larenstein
- Amsterdam Academy of Architecture

## **3. Programme per semester**

## **4. Exchange opportunities and minors at each institute (P.M.)**

- Wageningen UR
- TU Delft
- Van Hall Larenstein
- Amsterdam Academy of Architecture

# 1. Introduction

## 1. Contents and status

This document offers a comparative overview of the bachelor's and master's courses in landscape architecture offered by the four DSL partners:

- Wageningen UR
- TU Delft
- Van Hall Larenstein
- Amsterdam Academy of Architecture

With this working document, the DSL hopes to contribute to further collaboration between the participating institutes and better alignment of the various courses in the field of landscape architecture. In consultation with the partners, the DSL can make the document available for other purposes at a later stage.

## 2. How to read this document

- Section 2 contains an introduction to courses offered by each institute.
- Section 3 introduces the learning programmes per semester and provides an overview of the main features, roster, study load and language of the various modules per semester. In view of the number of modules, the exact specifications are not included in this document (except for those of the minors, see Chapter 4). You will find specifications for the modules in the (digital) prospectuses, and the relevant codes for each module are indicated on the charts. You will find the links to the digital prospectuses in the introduction to the courses at each institute under Section 10 in Chapter 2. Van Hall Larenstein does not offer a digital prospectus. As the Academy of Architecture is a four-year master's course, both the MA1 and MA2 last two years. That is why two semester are placed above each other per semester.
- Section 4 outlines the opportunities for exchange students at the various institutes.

### 3. Overview of institutes

Wageningen UR	BSc1 1st and 2nd semester	BSc 2 3rd and 4th semester	BSc 3 5th and 6th semester	MSc1 1st and 2nd semester	MSc 2 3rd and 4th semester
TU Delft	BSc1-BK 1st and 2nd semester	BSc2-BK 3rd and 4th semester	BSc3-BK 5th and 6th semester	MSc 1 1st and 2nd semester	MSc 2 3rd and 4th semester
Van Hall Larenstein	BA1 1st and 2nd semester	BA2 3rd and 4th semester	BA3 5th and 6th semester	BA4 7th and 8th semester	
Amsterdam Academy of Architecture				MA1 1st year	MA2 3rd year
				MA1 2nd year	MA2 4th year

## 2.1 Wageningen UR education programme

### 1. Aim

Students will be provided with knowledge and skills that enable and trigger them to develop landscape designs that are functional, meaningful, sustainable and beautiful.

### 2. Key features of Wageningen UR (University & Research) programme

Key features of the course in landscape architecture at Wageningen UR are:

- the landscape basis of designs and plans
- design and planning from local to a regional level
- the scientific character of the course
- the approach to landscape architecture as a contextual design discipline based on social, economic, political, culture-historical meaning and aesthetic values
- the adoption of a position in the analysis and solution of urgent landscape issues at global scale, such as climate change, water management, energy matters and the urbanization of deltas.

### 3. Language of instruction

Bachelor's: Dutch (80%), English (20%)

Master's: English

### 4. Admission requirements

*BSc programme admission requirements (for Dutch students)*

For the bachelor's course in Landscape Architecture and Planning:

- VWO diploma, Nature & Technology profile
- VWO diploma, Nature & Health profile
- VWO diploma Economics & Society profile
- VWO diploma, Culture & Society profile, including Maths A or B and Geography or Biology

*MSc Programme admission requirements*

Enrolment in an MSc Programme at Wageningen UR requires:

- A BSc degree (or equivalent) in a field of science relevant to your selected programme
- A Grade Point Average (GPA) for this BSc of at least 70% of the maximum grade
- Fluency in English, both written and spoken
- Good skills in mathematics and/or statistics
- Basic computer skills

Major in Landscape Architecture:

- The Landscape Architecture and Planning Admissions Committee asks prospective students to submit a design portfolio in order to assess their design skills.

### **5.1. Breakdown of bachelor's course**

In the bachelor's course in Landscape Architecture and Spatial Planning, students follow the same subjects for the first one-and-a-half years. The first introductory year covers subjects such as environmental studies, ecology and human geography, with a careful balance between society and surroundings. The subjects are intended as a foundation for the planning and design studios. The second year of the bachelor's course deepens insight. After 16 weeks of the second year, students choose either Landscape Architecture or Spatial Planning as their major. The third year finishes with a thesis and a minor.

### **5.2. Optional courses during bachelor's course**

Students can deepen or broaden their studies through optional courses (BSc3 - 30 ECTS) at Wageningen UR, or at another university of their choice. Approval is required for the optional courses chosen by students. An internship instead of an optional courses is not an option.

### **6.1. Breakdown of master's course**

The MSc Landscape Architecture and Planning is a two-year programme (120 ECTS). In general, students take cursory courses during the first year and focus in the second year on an internship or minor thesis and finish with the major thesis.

Three specializations are available within the master's course: Landscape Architecture, Socio-Spatial Analysis and Spatial Planning. The programme consists out of:

- a common part (24 ECTS), which is the same for all specializations and includes the Master Atelier and courses on philosophy and academic skills
- a specialization part (78 ECTS), which is different for all specializations and includes reflection on the professional practice course, a theory course, a methods course, minor thesis or internship, and major thesis
- an optional part (18 ECTS), which contains subjects chosen by students (or refresher courses in case of deficiencies).

A linkage programme is offered to students who comply with the general admission requirements but have too many deficiencies for direct admission to the MSc programme. After successful completion of the linkage programme within one year, the student gets admission to the MSc programme. The size of the linkage programme is 30 ECTS at most and should be completed within one year. A linkage programme will not be an option for foreign students.

A Refresher Programme of a maximum size of 18 ECTS is available for transfer students from at home and abroad. This is organized as part of (MSc1-S1).

Internship: Dutch students with an academic bachelor's degree complete an internship (LAR-70424). International students and Dutch students with a professional bachelor's degree can choose LAR-70424 or LAR-80424 if they have sufficient professional experience according to the study advisor.

## 6.2 Optional courses during master's course

The optional part (MSc1-S1 / 18 ECTS) of the master's contains subjects chosen by the students (or refresher courses in cases of deficiencies).

## 7. Architects Register

Students who obtain a master's degree in Landscape Architecture and Planning from Wageningen UR after 31 December 2014 and wish to register as a garden and landscape architect in the Netherlands, are obliged to complete a period of work experience. The period of work experience lasts two years and prepares graduates for the full practice of their profession. During this period, graduates work in professional practice and are supervised by experienced designers (mentors). After two years the graduates are eligible to join the Architects Register. More info: <https://www.architectenregister.nl/Beroepservaringperiode/index.aspx>

## 8. International affiliations and collaborative programmes

*WIMEK* is the Wageningen Institute for environmental and climate research. WIMEK participates in the Netherlands Research School for the Socio-Economic and Natural Sciences of the Environment (SENSE). WIMEK combines a range of natural and socio-economic sciences in studying the flow of substances through the environment and society.

*Euroleague for Life Sciences* The Landscape Architecture and Spatial Planning subject area is part of ELLS, the Euroleague for Life Sciences. Its mission is to develop the international dimension to landscape design and planning education and research, and put it into practice.

*ECLAS* is the *European Council of Landscape Architecture Schools*. The goal of ECLAS is to foster and develop scholarship in landscape architecture throughout Europe by strengthening contacts and enriching the dialogue between members of Europe's landscape academic community.

*IFLA* is the *International Federation of Landscape Architecture*. IFLA is the body representing landscape architects worldwide. Its purpose is to coordinate the activities of member associations when dealing with global issues, and to ensure that the profession of landscape architecture continues to prosper as it continues to influence the design and management of our environment.

## 9. Research

Research within landscape architecture is strongly linked to landscape design and mediates between the fields of natural and social sciences, the arts and the humanities. This results in complex and varied research topics, and interdisciplinary research projects. The core research objectives of the Landscape Architecture Group are:

- to develop methods and criteria for:

- analysing the social, economic, political, cultural and historical meanings of landscape that influence landscape architecture as a contextual design discipline;
- judging of the quality of designs;

- to develop the concept of 'research by design', both as a design method and as a research method;

- to analyse and contribute to solving pressing global landscape problems in the field of climate, water, energy and rural and urban land development.

## 2.2. TU Delft education programme

### 1. Aim

The programme focuses on providing the designers and planners of the future with the right skills to come up with new solutions for the effective, efficient and aesthetically responsible organization and exploitation of space.

### 2. Key features of the Delft University of Technology programme

The key features of the Delft University of Technology programme are:

- The course in landscape architecture at the TU Delft is one of the five master's courses (three of which are in design).
- Developing core design skills and academic thinking are the centrepiece of the programme.
- The track covers aspects of the discipline from the perspective of architecture and design, and in the context of the urban realm.
- Covers all aspects from planning to design practice, from theoretical considerations to practical exercises, and from research to policy-making
- The programme relates directly to the four cornerstones of research:  
Architecture and Landscape, Dutch Lowlands, Urban Landscapes and Heritage Landscapes.

### 3. Language of instruction

Bachelor's: Dutch and English (exception)

Master's: English

### 4. Admission requirements

#### BSc programme

##### *Numerus clausus*

The faculty works with a *numerus clausus*, which stipulates that some 450 new students will be admitted to the bachelor's course in architecture for the academic year 2014-2015. A weighted lottery is held on the basis of the average VWO final examination score. Candidates with an average examination score of 8 or higher are automatically admitted.

##### *Admission with a VWO diploma*

Admission to the bachelor's course in architecture is possible with a:

- VWO diploma, N&T profile
- VWO diploma, N&G profile with maths B and physics
- VWO diploma, E&M profile with maths B and physics
- VWO diploma, profile C&M with maths B and physics

#### *HBO/VO intake*

Admission to the first year of the programme is possible with a foundation course diploma obtained from another HBO or VO course, provided the student satisfies the maths and physics requirements. This means that a maths B and physics certificate at VWO 6 level must be achieved.

#### **MSc programme**

The bachelor's degree in Architecture, Urbanism & Building Sciences at the TU Delft gives unconditional entrance to the MSc Landscape Architecture course.

#### *Dutch students*

Undergraduate students wishing to transfer from other courses within the TU Delft, or from the University of Eindhoven or Twente, will be evaluated by the examination board to ascertain whether direct admission is possible. In addition, a number of related academic and vocational programmes in landscape architecture, planning, geography, civil engineering and urban design also form a valid basis for admission to the MSc Landscape Architecture course. Students with related BSc training will need to be approved by the examination board to gain admission.

#### *Bridging programme*

All students with deficiencies will need to follow a bridging programme of education prior to admission. It is also possible for students to enter the BSc programme at the faculty to offset deficiencies. In that case students will be assessed on an individual basis and be given credits for courses already followed at their previous study programme.

#### *International students*

The admission requirements for international students are:

- A university BSc degree. The main subject focused on during the BSc phase should be related to Landscape Architecture.
- A BSc Cumulative Grade Point Average (CGPA) of at least 75% of the scale maximum.
- Proof of English Language proficiency: A TOEFL\*\* (Test of English as a Foreign Language) score of at least 90 (Internet-based test) or IELTS\*\* (academic version) overall Band score of at least 6.5 or have passed the University of Cambridge 'Certificate of Proficiency in English' or the University of Cambridge 'Certificate in Advanced English'. Nationals from the USA, U.K., Ireland, Australia, New Zealand and Canada are exempted from the English test requirement.
- A clear and relevant essay in English. This essay (2000 to 3000 words) should cover the following aspects: • motivation • optional specializations • examples of master's thesis topics that interest you • a brief summary (maximum 250 words) of the thesis work or the final assignment
- An extensive curriculum vitae written in English.
- In addition, selection for the programme will include a portfolio review containing bachelor's study projects, including the graduation project by the student applicant. Work experience may be added to the portfolio, but it must be clear that it is professional work, with an indication of the status.

### **5.1. Breakdown of bachelor's course**

The bachelor's course in architecture is interdisciplinary (architecture, urbanism and landscape architecture) and leads to the master's track in landscape architecture.

The bachelor's course in architecture is organized in semesters. The core of the programme is design education, in which students learn to design at all scales, from technical details right up to the city and landscape. The design component takes the form of six design projects, each worth 10 ECTS. Projects become increasingly complex as the course progresses. The six projects concern design assignments in architecture, building technology, urban design and landscape architecture.

The study programme also covers technical skills such as drawing by hand and subjects such as architectural history, property management, computer science, structural engineering and mechanics. Plenty of attention is also devoted to social themes.

In the fifth semester (BA3-S1 – 30 ECTS) students follow a minor (a group of related subjects) at the TU Delft or at another university at home or abroad, or they can complete an internship. Students finish their bachelor's degree with two designs and a graduation project. Obtaining a bachelor's degree makes students eligible for the master's course in architecture.

Landscape architecture within the bachelor's course:

Landscape architecture forms part of the general BSc course, which is offered to all students of architecture during the first three years. Course elements:

- Lecture series in basic principles of urban design I (BSc 1); theory of landscape, landscape architecture and the relation between city and landscape.
- Basic principles of urban design III (BSc 3); introduction to and application of various urban design and landscape architecture techniques of analysis.
- BSc 3 (Bk3000) design project: an urban design in relation to a housing project.
- BSc 6 design project; featuring management game in which each team includes the role of 'the landscape architect'.
- Closing BSc diploma document: choice of landscape architecture design.
- BSc 5 minor: choice between minor in landscape architecture or internship.

### **5.2. Elective modules during bachelor's course**

The elective modules are offered in the fifth semester (BA3-S1 – 30 ECTS) and can be complemented with a minor (a coherent group of elective modules) at the TU Delft or at another university. The sixth semester contains an elective module worth 7 ECTS.

### **6.1 Breakdown of master's course**

The two-year master's course in landscape architecture in Delft is closely related to urban design and architecture. Various aspects of the discipline are covered during this phase, from theoretical debates to practical exercises and from research to policy — always viewed from an architectural perspective and the context of the urban environment. During the master's course, learning to design is always the focus, complemented by specialist professional

knowledge of landscape architecture, such as plant science, soil science, hydrology, ecology and sociology. The first year is divided into quarters, and the second year into semesters.

### **First year**

The first year consists of theoretical studies, assignments and practical design studio work. The first three quarters (MA1-S1+ MA1-S2/P1) of the programme are obligatory and complementary. They introduce students to the fundamental domains of landscape architecture at the TU Delft:

- Architecture and Landscape
- Dutch Lowlands
- Urban Landscapes

In the fourth quarter (MA1-S2/P2) students can choose a quarter within the Department of Landscape Architecture, Architecture or Urbanism in order to develop their knowledge and skills further. A mix of these subjects is also possible. The design project should have a minimum of 6 ECTS.

- Heritage Landscapes (design project + other course)
- Design project + other subjects in urbanism
- Design project + other subjects in architecture

### **Second year**

The third semester graduation studio (MA2-S1) is structured around projects within the research programme. Students contribute to research projects in the form of design research, comparative analysis and design experiments and a paper based on methodology research and a theoretical framework. In the fourth semester (MA2-S1), students develop a study plan and a proposal for a graduation thesis. An important objective during the graduation year is the development of a critical position in relation to the discipline, society and the built environment.

### **6.2 Optional subjects during master's course**

The fourth quarter (MA1-S2/P2) of the first year – 15 ECTS.

### **7. Architects Register**

Students who obtain a master's degree in landscape architecture from the TU Delft after 31 December 2014 and wish to register as a garden and landscape architect in the Netherlands, are obliged to complete a period of work experience. The period of work experience lasts two years and prepares graduates for the full practice of the profession. During this period, graduates work in professional practice and are supervised by experienced designers (mentors). After two years the graduates are eligible to join the Architects Register. More info: <https://www.architectenregister.nl/Beroepservaringperiode/index.aspx>

### **8. International affiliations and collaborative programmes**

Exchange students are students participating in a Socrates-Erasmus programme, or students from a university that has a bilateral agreement with the TU Delft. For more information: <http://www.bk.tudelft.nl/en/study/exchange-programme/>

## **9. Research**

The research programme contributes to the practice and theory of landscape architecture in urban and delta contexts and into cultural landscapes and the application of GIS in landscape research. The programme is divided into four knowledge domains:

- Architecture and Landscape
- Dutch Lowlands
- Urban Landscapes
- Heritage Landscapes

More info: <http://www.bk.tudelft.nl/nl/over-faculteit/afdelingen/urbanism/organisatie/leerstoelen/leerstool-Landscape-Architecture/>

## 2.3. Van Hall Larenstein education programme

### 1. Aim

The course in Garden and Landscape Architecture (T&L) aims to prepare students from HAVO and MBO-4 level for HBO positions within the professional field of garden and landscape architecture. Upon completion of the course, students will have acquired both the general HBO skills and skills specific to the profession. The general HBO skills are listed in the Dublin Descriptors, and the skills specific to the profession are contained in the T&L Key Skills. The key skills of the T&L course are:

- Formulating and developing policy
- Designing outside space and landscape
- Making a technical design
- Preparing and realizing projects, managing projects, supervising projects
- Maintaining outside space
- Selecting and advising on planting

### 2. Key features of the Van Hall Larenstein programme

Key features of the course in Garden and Landscape Architecture (T&L) are:

- The T&L course is a four-year course
- Bachelor's & associate degree
- The T&L course relates closely to job positions within the profession
- Study projects are mostly taken from professional practice.

### 3. Language of instruction

Dutch

Major: Dutch and English

### 4. Admission requirements

*HAVO admission requirements*

NT, NG, EM, CM with wia or wib

*VWO admission requirements*

All profiles are immediately admissible.

*MBO admission requirements*

Until the first year, all students with an MBO-4, KF diploma are admitted. Dutch, English, maths and chemistry at C level are very highly recommended to ensure a good chance of success. An intake meeting always takes place prior to admission. NB: a special introductory course has been compiled specially for MBO students.

*Other courses*

For all other courses and/or profiles, please contact the admissions committee via [info@vanhall-larenstein.nl](mailto:info@vanhall-larenstein.nl).

### **5.1. Breakdown of bachelor's course**

The bachelor's course comprises four majors, defined by positions within the profession:

- Landscape Architecture
- Garden Architecture
- Realization T&L
- Management of Outside Space

### **Foundation course and second year**

The first two years (BA1 and BA2) are the same for all four majors courses in Garden and Landscape Architecture. The foundation course and second year focus on creating a broad foundation and learning to approach the work within the profession of garden and landscape architecture from various perspectives. Projects in the second year are more integrated and realistic. Subjects offered during the second year include: Design, Plan Elaboration, Landscape Construction, Planting and Landscape Ecology. Students choose a major at the end of the second year.

### **Third year**

The third year (BA3) is strongly oriented to practice. The first part (BA3-S1) consists of two big projects: the Combi Major, and Design & Urbanism. In the Combi Major, students from different courses work together on a big ecology project. In addition to this project there is time for study activities chosen by students. In the second semester (BA3-S2) students complete a half-year internship at home or abroad.

### **Fourth year**

The fourth year is divided into two. The first half (BA4-S1) is a minor selected by students. They can follow their chosen minor at Van Hall Larenstein or at another institute. For example, they can use the time to prepare for a master's course at a University of Technology or at Wageningen UR, or spend half a year studying abroad. The second half (BA4-S2) consists of the graduation project that involves making a design for an area or conducting research into a subject chosen by students.

### **5.2. Elective modules during bachelor's course**

In the first semester of the third year (BA3-S1), students can choose course modules worth 6 ECTS. The first semester of the fourth year (BA4-S1) contains a minor, chosen by students, awarded 30 ECTS.

### **5.3. Minors and exchange**

The first half of the fourth year (BA4-S1, 30 ECTS) is devoted to a minor chosen by students. More info: See Chapter 4. Exchange and Minors. A minor can be followed at another institute. The right to a second registration at every other institute of higher education exists on the grounds of registration at Van Hall Larenstein. Van Hall Larenstein is affiliated to Kies op Maat.

### **6. Master's**

N/A

## 7. Architects Register

N/A

## 8. International affiliations and collaborative programmes

Van Hall Larenstein University of Applied Sciences gathers knowledge from society and is therefore able to educate students to a high level. Van Hall Larenstein supports the idea of 'knowledge cycle'. This means the university takes knowledge from society, enriches it, and then returns it to society and clearly communicates what can be done with this knowledge. The knowledge cycle works in a large number of INTERREG projects together with other universities of applied sciences in Europe.

### *Research themes*

Eco Engineering

Shrinkage

Climate Change

The Green City

Urban Renewal

Communication and Participation

### *Place within programmes*

GO, Minor in Urban Planting, Major in Plan Realization

Major in Landscape Architecture (LA), Minor in Landscape and Urbanization

Major in Landscape Architecture (LA)

Minor Urban Planting, Majors LA and TA

Management of Outside Space

Management of Outside Space, Minor in Landscape and Urbanization

See also lectureship under Section 9.

## 9. Research / lectureship

The Green Environment in Cities lectureship was launched on 1 April 2007, and Wim Timmermans is the lecturer. The lectureship aims to stimulate practice-based research at Van Hall Larenstein and to form a link between education and the business world, government and institutions. The lectureship focuses on sustainable and green transitions in Dutch urban areas:

- Green in and around the city (GIOS). How can green make an enduring contribution to the quality of the city?
- Climate change. How can the city respond optimally to change?
- European collaboration
- Green Cities Academy (within the scope of research at Van Hall Larenstein)

## 2.4 Amsterdam Academy of Architecture education programme

### 1. Aim

The Academy of Architecture prepares students to practice spatial design as a discipline at the interface of art, building technology, structural engineering, culture and spatial studies. The deliberately chosen link with art education (Amsterdam School of the Arts) underlines the exceptional importance that the academy attaches to the artistic dimension of professional practice.

A landscape architect who has graduated from the academy has:

- knowledge of and insight into the physical-biotic phenomena and anthropogenic processes that form the foundation of and are bound up with the phenomenon of landscape;
- knowledge of and insight into the effects that occur in the transformation of the natural and spatial environment;
- knowledge of and insight into the temporal dimension of the spatial environment;
- skill in handling natural components within the physical environment;
- knowledge of and insight into human activities in connection with the spatial environment;
- knowledge of and insight into the planning process and its most important components: survey and analysis, formulation of aims and programmes, spatial planning, evaluation;
- knowledge, insight and skill with respect to language in the wide sense of the word. In other words, understanding and using words, signs, images, forms and symbols for the purpose of communicating ideas related to the design of the spatial environment;
- knowledge of and insight into the history and theory of landscape architecture in relation to related art forms;
- skill in finding design solutions for various spatial problems at various scales;
- skill in arriving at design solutions in the form of overall spatial concepts, in which the influence of and cohesion with the wider surroundings and the smaller elements in it is clear;
- knowledge of and insight into the techniques of elaborating design proposals.

### 2. Key features of the Academy of Architecture programme

Key features of the course in landscape architecture at the Amsterdam Academy of Architecture are:

- The course in Landscape Architecture is a master's course.
- Education on the basis of the view that spatial design is a practical and critical discipline that unites art, science and technology.
- The course is highly interdisciplinary (landscape architecture, architecture and urbanism)
- Students combine their studies with employment within the profession.

### 3. Language of instruction

Dutch and English

#### 4. Admission requirements

Direct admission to the course:

- Van Hall Larenstein: Garden and Landscape Architecture; all majors.
- Wageningen UR: Landscape Architecture and Spatial Planning.
- Horteco (Vilvoorde, BE).
- University College Ghent (Melle, BE): major in Landscape and Garden Architecture.
- TU Delft and Eindhoven: major in Architecture / Master of Architecture and Master of Urbanism: intake in the second year.
- Utrecht School of the Arts: major in Design in Urban Interior Architecture; Master of Urban Interior Architecture: intake in the second year.

Abroad

- Bachelor of Landscape Architecture or comparable and command of Dutch language.
- Master of Architecture of Urbanism: intake in second year after completing exam for preparatory course.
- Admission after successful completion of preparatory course in Urbanism and Landscape Architecture\*.
- InHolland Delft, HAS Den Bosch, Van Hall Larenstein University of Applied Sciences; major in Rural Renewal, Land and Water Management, and Forestry and Nature Management.
- InHolland Delft, Schools of Art in Utrecht, Amsterdam, Rotterdam, Deventer, NHTV: major in Spatial planning (or comparable).
- Academies of art: majors in Architectonic Design, Interior Architecture, Monumental Art or comparable.
- Master of Arts (in above-listed varieties): intake in second year.

\* A conversation with the head of the department or study advisor will determine if you need to complete a preparatory course.

#### 5. Bachelor

N/A.

#### 6.1 Breakdown of master's course

The master's course at the academy lasts four years and is divided into semesters. A semester covers two quarters of two times eight weeks. A complete academic year lasts 42 weeks. The in-house curriculum totals 120 ECTS, while the extracurricular programme consists of practical experience and totals 120 ECTS. Students obtain a total of 240 ECTS during the master's programme. All projects, exercises, form studies and lectures are offered during the semesters.

#### 6.2 Elective modules during master's course

Students in the second and third years must obtain a total of 4 ECTS credits by selecting from the following programme of elective modules:

- Workshops at academy (summer months) or elsewhere
- Capita Selecta series
- Excursions (1 ECT per excursion)
- Self-management seminars (Semester 4)

- Optional course in presentation (from Semester 4 on)
- The AHK optional course programme
- Study at other institutes

### **6.3 Minor in Urbanism, Landscape Architecture and Architecture**

This minor is an introduction to the design disciplines of urbanism, landscape architecture and architecture, with the emphasis on the first two. More info: see Chapter 4. Exchange and Minors.

### **7. Architects Register**

Students who obtain a master's degree in landscape architecture from the Academy of Architecture can register immediately as a garden or landscape architect. More info:

<https://www.architectenregister.nl/Beroepservaringperiode/index.aspx>

### **8. International affiliations and collaborative programmes**

The academy is contributing to the development of the European Master of Landscape Architecture (EMiLA), a collaborative venture with colleges in Edinburgh, Versailles, Hanover and Barcelona. This operated on a trial basis in 2012 and is expected to be launched in 2013. To date, three Erasmus IP workshops have been held with EMiLA schools: Hanover in 2010, Amsterdam in 2011, and Barcelona in 2012.

The academy is part of a selective network of mostly European colleges that exchange selected students and teaching staff on a limited scale:

- participation in the European Association of Architectural Education (EAAE)
- participation in the LE:NOTRE Thematic Network Project in Landscape Architecture
- visits to fellow institutes abroad
- participation of students from foreign colleges in the Winter Workshop at the academy
- Erasmus summer workshops in architecture and landscape architecture on location in Europe
- Socrates/Erasmus programme: exchange agreements signed with nine colleges (Copenhagen, Bern, Paris, Versailles, Blois, Berlin, Brussels, Ljubljana and Barcelona). Exchange with other colleges is possible if they are affiliated to the Socrates/Erasmus programme.

Further:

- Leonardo programme
- English-language subjects are offered in the third year for foreign students.

### **9. Research / lectureship**

Han Wiskerke has been appointed guest lecturer in Foodscapes from 1 January 2013. The Foodscapes lectureship forms part of the programme and research within the master's course in landscape architecture. Han Wiskerke will be affiliated to the academy for the next four years. He will give lectures and organize two Capita Selecta lecture series. His research will culminate in a publication that will appear in 2016. Wiskerke will also supervise graduation and doctoral students.

Wiskerke will highlight three themes in his lecture programme:

- changes in urban and rural surroundings and the way in which those changes influence one another
- social and economic relationships within the urban region
- possibilities of deploying design and redesign to develop enduring food landscapes, or 'foodscapes', at a regional level.

Wiskerke will link those themes to the spatial design research by students of the master's course in landscape architecture. They are in an eminent position to come up with spatial scenarios for future cultural landscapes and also make an aesthetic contribution to the transformation of areas. Under his supervision, students will work on concrete research projects linked to the Rural Sociology Group at Wageningen UR.

#### **10. Digital prospectus, links and contact**

Digital prospectus: [http://www.prospectus.academievandebouwkunst.nl/2012-2013/opleidingen/Landscape Architecture/Prospectus](http://www.prospectus.academievandebouwkunst.nl/2012-2013/opleidingen/Landscape%20Architecture/Prospectus):
